SERVICE BULLETIN #10

Subject: Mandatory Inspection and Suggested Replacement of Aluminum Wing Tanks
To: All KITFOX Owners with Aluminum Wing Tanks
From: Denney Aircraft Company

Recently we have received reports from some KITFOX owners describing the development of fuel leaks on the leading edge of some six gallon aluminum wing tanks. Denney Aircraft Company is investigating these reports.

IT IS IMPERATIVE THAT YOU INSPECT YOUR AIRCRAFT BEFORE AND AFTER EACH FLIGHT FOR POSSIBLE FUEL LEAKS FROM THE ALUMINUM WING TANKS. If any evidence of leakage is observed, contact the Builder Support Group at Denney Aircraft Company immediately and **DO NOT FLY** the aircraft until corrective measures are taken.

We strongly recommend KITFOX owners take advantage of the latest safety technology available. We believe that fiberglass fuel tanks have shown to be superior to aluminum fuel tanks, and we are now using fiberglass fuel tanks in our airplane kits. To encourage our customers with aluminum fuel tanks to make this important safety conversion, Denney Aircraft Company will participate in the cost of this conversion by making six gallon fiberglass fuel tanks available to KITFOX builders at a special exchange price upon return of the aluminum tanks to our factory. This offer is made regardless of whether the aluminum tanks have developed leaks. See the accompanying information for details.

If you need assistance in any way, please call customer service. Before returning any items to Denney Aircraft Co. please obtain a Return Goods Authorization (RMA) number from customer service.

Nampa Airport, 100 N. Kings Rd., Nampa, Idaho 83687 • (208) 466-1711 • FAX (208) 466-7194

SPECIAL EXCHANGE PROGRAM

Six Gallon Wing Tanks

For each six gallon aluminum wing tank received from a customer (freight prepaid by the customer) Denney Aircraft Company will schedule shipment of a special kit containing a new six gallon fiberglass wing tank, ample fabric for wing repair, ample structural adhesive for mounting the fiberglass tank, and written instructions. The fiberglass wing tanks that we supply have been treated with an interior sloshing compound which protects the fiberglass resins from action by fuel additives and supplements. The price for each special exchange kit is \$95 plus shipping.

Please complete the information below and return it to Denney Aircraft Company by either FAX or mail as soon as possible. Please use the forms below so we can most effectively arrange and schedule your shipment of replacement wing tank(s). After completion and return of these forms, we will be able to determine the schedule and timeframe for shipment of replacement tank kits. If you answer "Yes" to question #3 below, we will contact you to schedule the return of your current tanks and the shipment of the special tank kits.
